-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 October 2003 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1, 4, 5, 11 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenawalt et al. (US 4,109,792) in view of Bruhn (US 5,713,186).

The Greenawalt et al. reference meets all of applicant's claimed subject matter with the exception that the filling is

Art Unit: 3721

done by metering as opposed to continuous. The Bruhn reference discloses a method and apparatus for forming bags including the disclosure that it is old and well known to fill the tube by metering or continuously filling -- see col. 4, lines 1-11, and accordingly, to cut the tube while the tube is continuous filled. It would have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to have modified the method and apparatus of Greenawalt et al. to have continuous filled the tube and to have cut the tube while the tube is continuously filled, in place of metered filling, as taught by Bruhn, as the operation of the Greenawalt et al. method and apparatus would perform as equally well with either metering or continuous filling of the tube, absent any evidence to the contrary.

Allowable Subject Matter

4. Claims 2, 3, 6-10, 12 and 13 are allowed.
